

H & M HENNES & MAURITZ AB

THREE-MONTH REPORT

1 December 2010 – 28 February 2011

THE FIRST QUARTER

- The H&M Group's sales excluding VAT increased by 9 percent in local currencies. Converted into SEK, sales amounted to SEK 24,503 m (24,846), a decrease of 1 percent. The difference between the sales development in local currencies and in SEK is due to a strong negative currency translation effect since the Swedish krona has strengthened against most of the sales countries' currencies.
- Sales increased by 1 percent in comparable units.
- Gross profit amounted to SEK 14,174 m (15,390), corresponding to a gross margin of 57.8 percent (61.9).
- Profit after financial items amounted to SEK 3,538 m (5,055). Group profit after tax was SEK 2,618 m (3,741), corresponding to SEK 1.58 (2.26) per share.
- Sales in February 2011 increased by 9 percent in local currencies compared to the same month last year.

-
- Sales in the period 1 – 29 March 2011 increased by 3 percent in local currencies compared to a very strong comparative period last year that benefited from, among other things a positive Easter effect.
 - Successful openings of H&M's first two stores in Romania.

Comments by Karl-Johan Persson, CEO

"We increased sales in local currencies by 9 percent and 1 percent in comparable units in a continued tough market. The quarter was also characterised by the fact that many external factors had a negative effect on the results, in contrast to last year when they had a favourable effect in the corresponding quarter. These external factors, which were beyond our influence, were for example strong negative currency effects and cost inflation in the sourcing markets with for example, significantly higher cotton prices. Instead of passing on these cost increases to customers, we chose to strengthen our price position in order to build further on our strong market position for the long term."

	Q1 2011	Q1 2010

Earnings per share, SEK	1.58	2.26

Sales and store openings

Sales including VAT increased by 9 percent in local currencies during the first three months of the financial year. Converted into SEK, sales decreased by 1 percent and amounted to SEK 28,708 m (29,095). Sales in comparable units increased by 1 percent. Sales excluding VAT increased by 9 percent in local currencies. Converted into SEK, sales excluding VAT decreased by 1 percent and amounted to SEK 24,503 m (24,846).

Sales including VAT in local currencies increased by 9 percent in February compared to the same month the previous year. Sales in comparable units increased by 1 percent.

The Group opened 9 (10) stores and closed 3 (6) stores during the three-month period. The total number of stores in the Group as per 28 February 2011 thus amounted to 2,212 (1,992), of which 50 franchise stores, 35 COS stores, 49 Monki stores, 18 Weekday stores and one Cheap Monday store.

Results for the first quarter

Gross profit for the Group for the first three months amounted to SEK 14,174 m (15,390), a decrease of 8 percent. This corresponds to a gross margin of 57.8 percent (61.9).

Operating profit amounted to SEK 3,408 m (4,978). This corresponds to an operating margin of 13.9 percent (20.0).

Operating profit for the three-month period has been charged with depreciation amounting to SEK 808 m (772).

Consolidated net interest income for the Group was SEK 130 m (77).

Profit after financial items amounted to SEK 3,538 m (5,055).

The Group's profit for the three-month period after applying an estimated tax rate of 26.0 percent (26.0) was SEK 2,618 m (3,741), which represents earnings per share of SEK 1.58 (2.26), a decrease of 30 percent.

Return on shareholders' equity, rolling twelve months was 39.3 percent (41.4) and return on capital employed, rolling twelve months, was 52.3 percent (55.4).

Comments on the first quarter

Sales increased by 9 percent in local currencies in the quarter. Despite an increase in sales in local currencies, sales in reported currency SEK decreased since the Swedish krona has strengthened against most of the sales countries' currencies. This resulted in strong negative currency translation effects. Sales reported in SEK thus decreased by 1 percent.

Sales in comparable units increased by 1 percent in a quarter that was characterised by continued restrained consumption, a discount driven market with many price activities and unfavourable weather conditions. In December, stores in several markets had to close periodically due to heavy snowstorms.

The gross margin amounted to 57.8 percent (61.9). The gross margin was negatively affected by many external factors in the sourcing markets which led to increased purchasing costs. These factors had a favourable effect in the corresponding quarter the previous year. Examples of disadvantageous external factors for the first quarter 2011 were accelerating cost inflation in the sourcing markets with significantly higher cotton prices, less spare capacity and increased transportation costs in combination with a negative US dollar effect. Instead of passing on these higher purchasing costs to the customers, H&M chose to strengthen its price position. This in order to build further on H&M's strong market position for the long term.

In the corresponding quarter last year, the gross margin was positively affected by 0.8 percentage units due to the former currency hedging policy.*

Mark-downs in relation to sales were on the same level as in the first quarter 2010 and thus had a neutral effect on the gross margin year-on-year.

Selling and administrative expenses amounted to SEK 10,766 m (10,412) in the quarter, an increase of 3 percent. In local currencies, the increase was 12 percent. The increase in costs was mainly related to the expansion but also to continued investments in marketing, IT and online and catalogue sales in order to further strengthen H&M's market position in the long term and to secure future expansion.

Profit after financial items amounted to SEK 3,538 m (5,055). The decrease is mainly due to the cost inflation in the sourcing markets and to strong negative currency effects.

The stock-in-trade increased by 29 percent compared to the same time previous year and amounted to SEK 10,822 m (8,402). In local currencies, the increase was 33 percent. The increase in stock-in-trade is explained by the expansion but should also be viewed in the light of last year's historically low level and the fact that sales in the quarter did not increase as much as planned. The stock-in-trade as per 28 of February 2011 is well balanced with a larger proportion of spring garments compared to the corresponding time the previous year. The stock-in-trade in relation to sales excluding VAT, rolling twelve months, was 10.0 percent (8.2), which is at a good level.

* H&M changed its currency hedging policy as of 1 December 2009, see the Full-year report from 28 January 2010.

Financial position and cash flow

Consolidated total assets as per 28 February 2011 amounted to SEK 57,030 m (56,675), an increase of 1 percent compared to the same time the previous year.

During the three-month period, the Group generated a cash flow of SEK -1,961 m (-4,943). The current operations generated a positive cash flow of SEK 761 m (5,380). Cash flow was among other things affected by investments in fixed assets of SEK -807 m (-703) and by short-term investments with a duration of four to twelve months of SEK -1,937 m (-9,565). Liquid funds and short-term investments amounted to SEK 24,355 m (26,200).

The stock-in-trade increased by 29 percent compared to the same time the previous year and amounted to SEK 10,822 m (8,402). This corresponds to 10.0 percent (8.2) of sales excluding VAT, rolling twelve months. The stock-in-trade was 19.0 percent (14.8) of total assets.

The equity/assets ratio was 79.9 percent (77.2) and the share of risk-bearing capital was 81.4 percent (80.8).

Shareholders' equity apportioned on the outstanding 1,655,072,000 (1,655,072,000) shares as per 28 February 2011 was SEK 27.54 (26.43).

Expansion

H&M remains positive towards the future expansion and the company's business opportunities.

For the 2010/2011 financial year a net addition of approximately 250 stores is planned. China, the UK and USA are expected to be the largest expansion markets for H&M in 2011.

H&M's first two stores in Romania, which were opened in Bucharest at the end of March, were very well received.

As previously communicated, Croatia and Singapore will become new H&M countries in 2011 and Morocco and Jordan will become new franchise markets.

The expansion in online and catalogue sales continues with the roll-out of the new H&M Shop Online and the launch of online and catalogue sales in the USA at the turn of the year 2011/2012.

The Group plans to open 97 stores (76) and close 8 (6) stores during the second quarter of 2011.

Tax

For the financial year 2010/2011 the tax rate is estimated to amount to approximately 26 percent.

Parent company

The parent company's external sales amounted to SEK 1 m (-) for the first quarter. Profit after financial items amounted to SEK 215 m (282). Investments in fixed assets amounted to SEK 22 m (13).

Comments on the second quarter

Sales during the period 1 – 29 March 2011 increased by 3 percent in local currencies compared to the same period the previous year. Sales in March should be viewed in the light of a very strong sales increase of 21 percent in March 2010, which among other things was positively affected by the fact that last year, the beginning of the Easter week occurred at the end of March.

The first units in the long-term H&M Incentive Program will be allocated to the employees during 2011. If the 2011 Annual General Meeting approves the proposed dividend of SEK 9.50 per share the contribution to the foundation H&M Incentive Program will be SEK 248 m, which will be recognised as a cost in the second quarter 2011.

Enhanced information on monthly sales development

H&M plans to enhance the information concerning monthly sales development. In the future, the company will also publish press releases for the sales development for each of the months of February, May and August. Previously, sales for these months were published in connection with the relevant interim report. Sales development for December will also be issued as a separate press release. This means that each month's sales development will be published on the 15th of the following month. If the 15th falls on a weekend, the information will be published on the first weekday thereafter.

When the percentage sales development is published for February, May, August and November, which are the last months of each quarter, sales figures in SEK for the quarter will also be published. This will illustrate the impact of currency translation on the quarter's sales in SEK. The sales development figures for May 2011, which will be published on 15 June 2011, will be the first to state both the percentage change compared with the same month in the previous year as well as the total sales for the quarter in SEK.

Accounting principles

The Group applies the International Financial Reporting Standards (IFRS) as adopted by the EU. This report has been prepared according to IAS 34 Interim Financial Reporting as well as the Swedish Annual Accounts Act.

The accounting principles and calculation methods applied in this report are unchanged from those used in the preparation of the Annual Report and Consolidated Financial Statements for 2009/2010 and described in Note 1 – Accounting principles.

In its segment reporting the Group has grouped countries together into three geographical areas: the Nordic Region, the Euro Zone excluding Finland and the Rest of the World. The financial characteristics are similar in each segment. The parent company and other subsidiaries without external sales are reported in a separate Group function segment.

The parent company applies the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, which essentially involves applying IFRS. In accordance with RFR 2 the parent company does not apply IAS 39.

Earnings per share has been calculated based on the new number of shares. According to IAS 33 *Earnings Per Share*, the earnings per share is adjusted retroactively for all reported periods.

Risks and uncertainties

A number of factors may affect H&M's results and business. Most of these can be dealt with through internal routines, while certain others are affected more by external influences. There are risks and uncertainties related to fashion, weather situations, changes in consumer behaviour, climate changes, trade interventions, external factors in production countries and foreign currency, but also in connection with expansion into new markets, the launch of new concepts and how the brand is managed.

For a more detailed description of risks and uncertainties, refer to the Administration Report and to Note 2 in the Annual Report and Consolidated Accounts for 2009/2010. There were no significant changes in risks and uncertainties during the period.

KEY RATIO DEFINITIONS

Return on equity: Profit for the year in relation to average shareholders' equity.

Return on capital employed: Profit after financial items plus interest expense in relation to average shareholders' equity plus average interest-bearing liabilities.

Share of risk-bearing capital: Shareholders' equity plus deferred tax liability in relation to the balance sheet total.

Equity/assets ratio: Shareholders' equity in relation to the balance sheet total.

Equity per share: Shareholders' equity divided by number of shares.

P/E ratio: Price per share divided by earnings per share.

Comparable units: Comparable units comprise the stores and the internet and catalogue sales countries that have been in operation for at least one financial year. H&M's financial year runs from 1 December to 30 November.

All figures within parenthesis refer to the corresponding period or point of time the previous year.
